Board of Directors, AFS — 1977 .....	v
Proceedings Summary of 81st Annual Meeting .....	vi
Report of AFS Executive Vice-President .....	xiii
Report of AFS Vice-President Technology .....	xvi
Report of the Secretary .....	xx
Minutes, First Meeting AFS Board of Directors 1976-77 .....	xxii
Minutes, Cast Metals Institute Trustees Meeting .....	xxiv
Minutes, Annual Meeting of AFS Board of Directors .....	xxvii
Minutes, AFS Technical Council Meeting .....	xxxii
Minutes, Cast Metals Institute Trustees Meeting .....	xxxv
Minutes, Mid-Year Meeting of AFS Board of Directors .....	xxxviii
Minutes, Cast Metals Institute Trustees Special Meeting .....	xlili
Minutes, Final Meeting AFS Board of Directors 1976-77 .....	xlv
Minutes, AFS Technical Council Meeting .....	xlvii
Official Program, 34th Annual AFS Chapter Officers Conference .....	i
Gravity Segregation and Its Effect on Tensile Properties of Magnesium Casting Alloys (77-01) — <i>B. Lagowski</i> .....	1
Continuous Desulfurization of Iron in High-Production Foundries by the Porous Plug Method (77-22) — <i>G. McGlothlin</i> .....	5
Who's Afraid of Cast-to-Size Tooling (77-10) — <i>M. J. Sreden</i> .....	9
Effect of Compositional and Process Variables on the Tensile Properties of Cast Nickel-Aluminum Bronze (77-99) — <i>R. Thomson, J. O. Edwards</i> .....	13
Repair Techniques for Metal Equipment in a High-Production Foundry (77-08) — <i>D. E. Hoover</i> .....	19
Ultimate Disposal of Foundry Waste Sludges (77-39) — <i>W. M. Throop</i> .....	23
A Literature Survey on Nitrogen in Malleable Iron (77-30) — <i>G. R. Strong</i> .....	29
Production Welding of Cast Irons (77-29) — <i>S. D. Kiser</i> .....	37
Molding Practice, Control and Raw Materials in the United Kingdom (77-17) — <i>G. Ashby</i> .....	43
Aluminum Alloyed Cast Iron Properties Used in Design (77-43) — <i>R. P. Walson</i> .....	51
Simulating the Effect of Thermocouple Assemblies on Temperature Measurement (77-42) — <i>W. C. Erickson, A. V. Houghton</i> .....	59
Formation and Control of Lustrous Carbon Surface Defects (77-71) — <i>R. L. Naro, R. D. Tenaglia</i> .....	65
Ceramic Fiber Applications in the Foundry Industry (77-48) — <i>J. F. Reynolds</i> .....	75
Submerged Arc Welding of Ductile Iron (77-75) — <i>M. A. Davila, D. L. Olson, T. A. Freese</i> .....	79
Recycling Wet Dust Collector Waste in Green Sand Systems (77-49) — <i>T. E. Burden</i> .....	87
Inoculation of Gray Iron by Controlled Additions of a Wire Containing an Inoculant Core (77-04) — <i>K. B. Rundman, B. Weiss, J. Nieman, S. D. Sanders</i> .....	91
Examination of the French Test Bar Design, the US Keel Block and a Reduced Keel Block for ISO Standardization of Cast Copper Alloys (77-106) — <i>A. Couture, J. O. Edwards</i> .....	97
A Management Approach to Improving Quality (77-45) — <i>F. H. Reuwer</i> .....	107
Recovery and Use of Ferrous Scrap from Municipal Refuse (77-03) — <i>E. J. Ostrowski</i> .....	111

Austenitic-Bainitic Ductile Iron (77-73) — <i>M. Johansson</i> ..	117
New Sand from Old: Thermal Reclamation—A Better Alternative (Three Case Studies) (77-74) — <i>J. J. Geremia</i> .....	123
An Evaluation of Graphite-Shape Consistency in Compact-Flake-Graphite Iron from Mechanical Property Data (77-87) — <i>N. P. Lillybeck, M. G. McKimpson, R. T. Wimber, D. W. Donis</i> .....	129
A Natural Aging Aluminum Alloy, Designed for Permanent Mold Use (77-111) — <i>B. Chamberlain, S. Watanabe, V. J. Zabek</i> .....	133
Critical Review of the Casting Properties and Welding of High-Strength Cast Cupronickel (77-24) — <i>J.-L. Dion, J. O. Edwards, W. P. Campbell</i> .....	143
Heat Treatment of 2-1/4Cr-1Mo Cast Steel for Turbine Cylinder Casings (77-31) — <i>S. Nakada, Y. Iwabuchi, K. Suzuki</i> .....	151
Pattern Material Wear or Erosion Studies (77-05) — <i>R. D. Maier, J. F. Wallace</i> .....	161
Graphite Configuration in Gray Iron (77-56) — <i>G. F. Ruff, J. F. Wallace</i> .....	167
Relation Between the Transverse and Tensile Strength of Gray Iron (77-56A) — <i>G. F. Ruff, J. F. Wallace</i> .....	171
Effects of Solidification Structures on the Tensile Properties of Gray Iron (77-56B) — <i>G. F. Ruff, J. F. Wallace</i> .....	179
Chemical Emissions from Foundry Molds (77-98) — <i>W. D. Scott, C. E. Bates, R. H. James</i> .....	203
Decomposition of Resin Binders and the Relationship Between the Gases Formed and the Casting Surface Quality—Part 3 (77-55) — <i>C. E. Bates, W. D. Scott</i> .....	209
Trapping Slag and Solid Nonmetallic Material in Gating Systems for Cast Iron and Steel (77-12) — <i>K. G. Davis, J.-G. Magny</i> .....	227
Effect of Composition and Heat Treatment on the Tensile Properties of ZE41 (Mg-4Zn-1RE-0.7Zr) Casting Alloy (77-112) — <i>B. Lagowski</i> .....	237
Effect of Jolting on Springback and Green Compression Strength of Sand Systems Used in High-Pressure Squeeze Molding (77-33) — <i>T. Rangaswami, G. Ramakrishnan, H. Md. Roshan</i> .....	241
Control Charts for High-Pressure Molding (77-32) — <i>T. Rangaswami, G. Ramakrishnan, H. Md. Roshan</i> .....	245
Effect of High-Temperature Properties of Synthetic Molding Sands on Mold Quality (77-26) — <i>H. Md. Roshan, S. V. Sambasivam</i> .....	251
Expansion and Deformation Characteristics of Synthetic Molding Sands at Elevated Temperatures (77-15) — <i>S. V. Sambasivam, H. Md. Roshan</i> .....	259
Influence of Composition on Expansion Defects in Synthetic Molding Sands (77-41) — <i>S. V. Sambasivam, H. Md. Roshan</i> .....	265
Effects of Molybdenum on Transformation Characteristics and Properties of High-Strength Ductile Irons (77-70) — <i>J. E. Bevan, W. G. Scholz</i> .....	271
Determination of the Fracture Behavior of Ductile Cast Irons for Failure Analysis Purposes (77-51) — <i>N. Lazardis, R. K. Nanstad, F. J. Worzala, C. R. Loper Jr.</i> .....	277

Volumetric Changes During Freezing of Ductile Cast Iron (77-59) — G. L. Oliver, R. H. McSwain, C. E. Bates .....	289	Measurement of White Iron Toughness Using an Instrumented Impact Technique (77-58) — D. Burns, K. E. Hofer .....	453
Effect of the Mold on Casting Soundness (77-59A) — R. S. Lee, A. P. Volkmar .....	299	Evaluation of Core Sand Reclamation Processes (77-97) — C. L. Gibbons II, J. L. Bomback, G. E. Good, A. Hetke .....	469
Process Water Management (77-92) — D. J. Boos .....	307	Short-Cycle Heat Treating of Steel Castings (77-44) — F. H. Hohn .....	477
Reducing Cleaning Costs by Using Breakoff Cores (77-65A) — T. Nelson .....	309	Techniques for Neutralizing the Effect of Chromium in Malleable Iron: First Progress Report (77-57) — R. Singh, N. Bagchi, R. W. Heine .....	481
Influence of Alkaline Earth on Steel Metallurgy (77-19) — E. Spetzler, K. Nurnberg, R. Bruder .....	311	Controlling Cast Surfaces with Profile Tolerances (77-20) — P. E. McKim, K. E. Livingston .....	491
Computer-Aided Solidification Study of a Die-Cast Aluminum Piston (77-103) — R. B. Weatherwax, O. T. Riegger .....	317	Quality Control and Assurance by Sonic Resonance in Ductile Iron Castings (77-76) — B. V. Kovacs .....	499
Cold Box Design Specializing in Urethane-Lined Tooling (77-07) — R. L. Allen .....	323	Evaluation of the Graphite Form in Pearlitic Ductile Iron by Ultrasonic and Sonic Testing and the Effect of Graphite Form on Mechanical Properties (77-102) — A. G. Fuller .....	509
Cupola Reduction and Melting of Agglomerated Iron Ore Concentrate and Steel Plant Wastes (77-62) — M. A. Goksel, W. Provis .....	327	Effect of Graphite Form on Fatigue Properties of Pearlitic Ductile Irons (77-102A) — A. G. Fuller .....	527
Findings From the Treatment of High-Sulfur Ductile Irons (77-84) — H. A. Lustenberger, D. O. McCain .....	333	Liquidus and Eutectic Temperatures and Solidification of White Cast Irons (77-28) — R. W. Heine .....	537
Increasing Profits by Eliminating Waste in the Foundry (77-11) — C. A. Sanders .....	341	Cold Box Systems Engineering — Panel Presentation (77-131) — J. R. Schoen, D. J. Berant, R. A. Rowland, N. Luther, W. E. Schulze, W. Cheek .....	545
A New Method for Monitoring Silicosis (77-128) — K. A. Siegesmund, A. Funahashi, K. Pintar .....	349	Mechanical Properties of Aluminum Castings Alloys X206.0-T4 and XA206.0-T7 vs Comparable Alloys at Various Cooling Rates (77-93) — A. L. Kearney, J. Raffin .....	559
Variables Affecting Ladle Life for Steel Castings (77-52) — A. Petro, R. A. Flinn .....	353	Elimination of Shrinkage Defects Through Casting Redesign (77-114) — R. M. Kotschi, C. R. Loper Jr., R. E. Frankenberg, L. Janowski .....	571
Gas Content of Copper Alloy Melts — Test Equipment and Field Test Results (77-54) T. R. Ostrom, R. A. Flinn, P. K. Trojan .....	357	Meeting the Dimensional Standards of Tomorrow (77-64) — A. B. Draper .....	577
Influence of Ladle Inoculation and Holding Time on Structure and Mechanical Properties of Gray Iron Melted in Channel Furnaces (77-108) — N. K. Datta .....	365	<b>Hoyt Memorial Lecture</b> — Mold Materials for Ferrous Castings (77-18) — J. A. Rassenfoss .....	583
Gray Rim (Inverse Chill) and Mottle of Malleable Base White Iron (77-119) — R. W. Heine, J. E. Barton .....	371	Design at the External Corners of V Junctions Using Numerical Techniques (77-14) — G. P. Reddy .....	597
Eutectic Solidification of White Iron and Its Effects on Malleable Iron Castings (77-118) — R. W. Heine, J. E. Barton .....	379	Effect of Chills on the Soundness and Structure of Copper Alloys (77-100) — J. Redemske, G. Prokuda, M. J. Weins, J. J. Weins .....	609
Effect of Tramp Elements on the Properties of Steel (77-117) — D. L. Newhouse .....	389	The Case for Custom-Blended Inoculants Containing Graphite in the Production of Gray Iron Castings (77-104) — M. D. Bryant, J. Briggs, R. W. Neuman .....	617
Minerology of Foundry Sands and Its Effect on Performance and Properties (77-90) — T. E. Garner Jr. ....	399	Silver Anniversary Lecture — Effect of Mold and Core Materials on the Influence of Hot Tearing in Steel Castings (77-21) — G. DiSylvestro, C. A. Faist .....	627
Evaluation of Gray Iron Melt Systems (77-72) — D. D. Day .....	417	Computer Simulations on the Macrostructures in Centrifugal Castings (77-35) — Y. Ebisu .....	643
Refractory Raw Materials: Status of Supply (77-50) — J. C. Hicks .....	421	Discussions .....	655
Grain Refinement in Cast Aluminum Alloys (77-113) — R. M. Kotschi, C. R. Loper Jr. ....	425	Errata .....	662
Compactability and Clay in System Sand (77-27) — R. W. Heine, J. S. Schumacher .....	431	Author Index .....	663
Time-Temperature-Transformation Behavior and the Mechanical Properties of Bainitic Malleable Iron (77-40) — V. Gupta, J. F. Wallace .....	441	Subject Index .....	664

R. B. Weatherwax ..... 317  
J. J. Weins ..... 609  
M. J. Weins ..... 609  
B. Weiss ..... 91  
R. T. Wimber ..... 129  
F. J. Worzala ..... 277

## Z

V. J. Zabek ..... 133

# Subject Index

## A

- Aluminum
  - Die Casting, solidification simulation ..... 317
  - Grain refinement with boron & titanium ..... 425
  - High-strength alloy properties ..... 559
  - Self-aging permold alloy ..... 133
- Austempering
  - Ductile iron, effects of molybdenum additions ..... 271
  - Malleable iron, mechanical properties of bainite ..... 441

## B

- Bainitic structures
  - Malleable iron, mechanical properties ..... 441
- Binders (see Sand binders)

## C

- Cast Iron (see also specific types)
  - Aluminum-alloyed, properties and part design ..... 51
  - Desulfurization (continuous) by porous plug ..... 5
  - Slag and inclusion control by gating ..... 227
  - Welding ..... 37
- Cast-to-size tooling ..... 9
- Casting design
  - External corner effects by computer simulation ..... 597
  - Profile tolerancing system ..... 491
  - Shrinkage defect elimination ..... 571
- Casting soundness; mold stability effect ..... 299
- Centrifugal casting; 25% Cr - 20% Ni steel ..... 643
- Ceramic fiber insulation; applications ..... 75
- Charge material; pelletized waste reduction in cupola ..... 327
- Chemical emissions from molds ..... 203
- Chromium in malleable iron; neutralization effects ..... 481
- Clay content of system sands; effect on compactability ..... 431
- Cleaning; cost reduction with Washburn cores ..... 309
- Cold box process
  - Systems engineering ..... 545
  - Urethane-lined coreboxes ..... 323
- Compactability of system sands vs clay content ..... 431
- Compacted graphite iron
  - Composition ..... 129
  - Graphite configuration and microstructure ..... 129, 167
  - Properties ..... 129
- Computer simulation
  - Casting design; V-junctions ..... 597
  - Centrifugal casting; 25% Cr - 20% Ni steel ..... 643
- Control charts; high-pressure molding system sands ..... 245
- Copper alloys
  - Gas analysis; testing and equipment ..... 357
  - Test bar comparisons for ISO standardization ..... 97
- Cores; Washburn-type for cost reduction in cleaning ..... 309
- Core materials vs hot-tearing tendency of steel castings ..... 627
- Core sand reclamation; process comparisons ..... 469
- Coreboxes; urethane-lined for cold box process ..... 323
- Coremaking; cold box process systems engineering ..... 545
- Cost reduction in cleaning using Washburn cores ..... 309
- Crack propagation in ductile iron vs microstructure ..... 277
- Cupronickel alloys
  - Properties ..... 143
  - Welding ..... 143
- Cupola use of pelletized-waste charge materials ..... 327

## D

- Decomposition of sand binders
  - Chemical emission concentration ..... 203
  - Gases formed vs casting surface quality ..... 209
- Defects (see also specific type)
  - Hot-tearing of steel castings; effect of core and mold ..... 627
  - Inverse chill and mottle in white iron ..... 371
  - Sand expansion ..... 251, 259, 265
  - Shrinkage; reduction through casting design ..... 571
  - Slag and inclusions vs gating; cast iron and steel ..... 227
  - Steel, caused by tramp elements ..... 389
  - Surface-type caused by lustrous carbon ..... 65
- Design considerations; aluminum-alloyed cast iron ..... 51
- Desulfurization
  - Ductile iron, using pure magnesium ..... 333
  - Steel; TN process with alkaline-earth metals ..... 311
- Desulfurization (continuous) of cast iron by porous plug ..... 5
- Die Casting
  - Aluminum; simulation of solidification ..... 317
  - Dies; heat checking ..... 317
- Dimensional tolerances
  - Castings ..... 491
  - Green sand molding; statistical data ..... 577
- Ductile iron
  - Austempering; effects of molybdenum ..... 271
  - Austenitic-bainitic ..... 117
  - Fatigue properties vs nodularity ..... 527
  - Fractographic study as means of failure analysis ..... 277
  - Nodularity correlated with fatigue properties ..... 527
  - Properties; effect of molybdenum additions ..... 271
  - Quality control by sonic resonance testing ..... 499
  - Single-step desulfurization with pure magnesium ..... 333
  - Solidification; volumetric change measurements ..... 289
  - Sonic and ultrasonic testing; fatigue properties ..... 527
  - Sonic testing; correlation with structure and properties ..... 509
  - Sonic testing; evaluation of properties, defects & eutectic carbide ..... 499
  - Ultrasonic velocity testing; correlation with properties ..... 509
  - Welding ..... 37
  - Welding by submerged arc ..... 79

## E

- Energy conservation
  - Ceramic fiber insulation ..... 75
  - Heat treatment of steel with short-cycle technique ..... 477

## F

- Fading of inoculants in gray iron; effects on properties and structure ..... 365
- Fatigue properties vs nodularity; ductile iron ..... 527
- Ferrous castings; overview of mold materials and processes ..... 583
- Fracture; ductile iron analysis by fractography ..... 277
- Furnaces (heat treatment); ceramic fiber insulation ..... 75

## G

Gas analyses of copper alloys .....	357
Gating systems for removal of slag and inclusions .....	227
Grain refinement; aluminum alloys .....	425
Graphite configuration; gray and compacted graphite irons .....	167
Gray iron	
Graphite configuration and microstructure .....	167
Inoculant fading; effects on properties and structure .....	365
Inoculation with cored wire .....	91
Properties; transverse vs tensile strength .....	171
Solidification; effects on structure and properties .....	179
Statistical analysis for composition control .....	417
Tensile properties; correlation with structure .....	179
Transverse vs tensile strengths .....	171
Welding .....	37
Gray rim in white iron .....	371
Green sand molding; dimensional control standards .....	577

## H

Heat checking in diecasting dies .....	317
Heat transfer; computer simulation of solidification .....	597
Heat treating	
Ductile iron; austenitic-bainitic .....	117
Furnaces; using ceramic fiber insulation .....	75
Magnesium alloy ZE 41 .....	237
Malleable iron; effects and neutralization of Cr .....	481
Steel; 2-1/4% Cr - 1% Mo .....	151
Steel; short-cycle for energy savings .....	477
High-density molding	
Charts for controlling sand properties .....	245
Jolting effects on springback and green compression strength .....	241
Hot tearing	
Steel .....	311
Steel castings; effect of core and mold materials .....	627

## I

Inoculation of gray iron	
Cored-wire process .....	91
Fading effects on properties and structure .....	365
Inverse chill in white iron .....	371
Isothermal transformation of malleable iron .....	441

## L

Ladle practice for steel foundries vs refractory life .....	353
Lustrous carbon from organic binders; iron casting defects .....	65

## M

Machining of castings; profile tolerancing system .....	491
Magnesium alloys	
Gravity segregation effects on tensile properties .....	1
ZE 41 (4% Zn - 1% RE - 0.72% Zr), heat treatment and properties .....	237
Magnesium treatment; ductile iron, using pure Mg .....	333
Maintenance of pattern equipment .....	19
Malleable iron	
Bainitic; TTT behavior and mechanical properties .....	441
Chromium effects; neutralization .....	481
Eutectic solidification and its effects .....	379
Nitrogen; sources, solubility, effects and control .....	29
Toughness (white iron) measurement by instrumented impact test .....	453
Welding .....	37

Management and quality improvement .....	107
Management; process selection and improvement .....	341
Melting systems (gray iron); composition control .....	417
Microstructure	
Ductile iron; fractography study of crack propagation .....	277
Gray iron, as affected by inoculant fading .....	365
Mineralogy of sands; effect on properties and performance .....	399
Mold materials	
Ferrous castings; overview of usage .....	583
Steel castings, effect on hot-tearing tendency .....	627
Mold stability; effect on casting soundness and accuracy .....	299
Molding (green sand); dimensional control standards .....	577
Molding sand (synthetic); high temperature properties and effect on mold quality .....	251,259,265
Molybdenum in ductile iron; effects on transformation .....	271
Mottle in white iron .....	371
MTU Process for pelletizing wastes as cupola charge material .....	327
Municipal refuse; ferrous scrap recovery .....	111

## N

Nickel-aluminum bronze; composition and properties .....	13
Nitrogen in malleable iron; sources, solubility, effects and control .....	29
Nodularity in ductile iron; correlation with mechanical properties .....	509

## P

Pattern equipment maintenance .....	19
Pattern materials	
Cast-to-size tooling .....	9
Wear and erosion studies .....	161
Pelletized-wastes as cupola charge material .....	327
Permanent molding; self-aging aluminum alloy .....	133
Porous plug process; continuous desulfurization of cast iron .....	5
Profitability improvement .....	341
Properties (see also specific property)	
Aluminum alloys; comparisons .....	559
Compacted graphite iron .....	129
Cupronickel alloys .....	143
Ductile iron, austenitic-bainitic .....	117
Gray iron; effects of inoculant fading .....	365
Gray iron; transverse vs tensile strength .....	171
Malleable iron, bainitic .....	441
Molding sand (synthetic) at high temperatures .....	251,259,265
Steel; tramp element effects .....	389

## Q

Quality control of ductile iron by sonic resonance testing .....	499
Quality improvement; management approach .....	107

## R

Reclamation of core sand; process comparisons .....	469
Recovery of ferrous scrap from municipal wastes .....	111
Refractories	
Raw material status of supply .....	421
Steel casting; ladle life .....	353
Sand composition effects on expansion defects .....	265
Sand binders	
Decomposition and concentration of emissions .....	203
Decomposition and effect of gases on casting surface quality .....	209
Decomposition as source of lustrous carbon defects .....	65
Usage in the United Kingdom .....	43

Sand molding (see also high-density molding)	
Practice in the United Kingdom	43
Sand properties	
Compactability vs clay content in system sands	431
High-density molding	241
High-density molding; control charts	245
Mineralogical effects	399
Sand reclamation, thermal	123
Sands; mineralogy and effect on properties and performance	399
Scrap recovery (ferrous) from municipal wastes	111
Segregation in magnesium alloys and effect on tensile properties	1
Shrinkage; reduction by use of design factors	571
Silicosis monitoring by new technique	349
Simulation (computer)	
Aluminum die casting solidification	317
Centrifugal casting of 25% Cr-20% Ni steel	643
Freezing of external casting corners	597
Solidification	
Ductile iron; volumetric changes during freezing	289
Thermocouple effect on temperature reading	59
White iron; effect on properties after malleablizing	379
White iron; liquidus and eutectic temperature relations	537
Sonic testing	
Ductile iron; correlation with structure and properties	509,527
Ductile iron; evaluation of properties, defects, carbides	499
Statistical control of gray iron composition	417
Steel	
2-1/4% Cr-1% Mo	151
25% Cr-20% Ni; centrifugal casting simulation	643
Defects and effect of tramp elements	389
Desulfurization; TN Process using alkaline-earth metals	311
Heat treatment by short-cycle technique for energy saving	477
Hot tearing	311,627
Ladle life	353
Properties, tramp element effects	389
Slag and inclusion control by gating	227
Sulfide inclusions, elimination	311
Tramp elements effect on properties and defects	389
Sulfide inclusions in cast steel	311
Surface defects from lustrous carbon formation	65
Surface quality of castings; effect of binder decomposition	209

## T

Temperature; effect of synthetic sands and mold quality	251
---	-----

Temperature measurement; thermocouple effect on reading	59
Tensile properties	
Gray iron	171,179
Magnesium alloy ZE 41	237
Magnesium alloys; gravity segregation effect	1
Nickel-aluminum bronze	13
Test bar design comparisons for copper alloys	97
Test equipment for gas content measurement (copper alloys)	357
Thermocouple effect on temperature reading during solidification	59
TN Process for steel desulfurization with alkaline earth metals	311
Toughness (white iron) measured by instrumented impact test	453
Tramp elements in steel vs defects and casting properties	389
Turbine cylinder castings	151

## U

Ultrasonic testing of ductile iron; correlation with structure and properties	509
United Kingdom; molding practices, binder usage	43
Urethane linings for cold box pattern equipment	323

## W

Water management	307
Wear; pattern materials	161
Welding	
Cast irons	37
Cupronickel alloys	143
Ductile iron, by submerged arc	79
White iron	
Carbide structure related to toughness in impact testing	453
Solidification; effect on malleable castings	379
Solidification; liquidus and eutectic temperature relations	537
Toughness measurement by instrumented impact test	453

## X

X-ray analysis (EDXA) technique for early silicosis detection	349
---	-----
